International Thinking on Children in Museums Sharon E. Shaffer 2020-10-13 International Thinking on Children in Museums introduces current research, theory, and practice about young learners in museums around the world. The book imparts vital knowledge about the nature of childhood and children's learning that will improve understanding of the very youngest museum-goers. Including contributions from practitioners, scholars, and consultants around the globe, this volume examines museum practices and children's learning across a range of distinct cultural and geographic locales. The framework of the book is based on research and current thinking in the realm of developmental psychology, sociology, and anthropology, allowing the contributors to examine the evolution of early learning and children's programs through a sociocultural lens. This broad-based look at international museum practices for children offers a rare view of the field from an important, but oft-neglected perspective: that of society and culture. International Thinking on Children in Museums will broaden understanding of museum practice across cultures and geographic regions and, as such, will be of interest to scholars and students engaged in the study of museum education, museum studies, and early learning. By Fire, By Water Mitchell James Kaplan 2010-05-18 Recipient of the Independent Publishers Award for Historical Fiction (Gold Medal), the Foreword Book of the Year Award for Historical Fiction (Bronze Medal), and an honorable mention in the category of General Fiction for the Eric Hoffer Award. Luis de Santángel, chancellor to the court and longtime friend of the lusty King Ferdinand, has had enough of the Spanish Inquisition. As the power of Inquisitor General Tomás de Torquemada grows, so does the brutality of the Spanish church and the suspicion and paranoia it inspires. When a dear friend's demise brings the violence close to home, Santángel is enraged and takes retribution into his own hands. But he is from a family of conversos, and his Jewish heritage makes him an easy target. As Santángel witnesses the horrific persecution of his loved ones, he begins slowly to reconnect with the Jewish faith his family left behind. Feeding his curiosity about his past is his growing love for Judith Migdal, a clever and beautiful Jewish woman navigating the mounting tensions in Granada. While he struggles to decide what his reputation is worth and what he can sacrifice, one man offers him a chance he thought he'd lost...the chance to hope for a better world. Christopher Columbus has plans to discover a route to paradise, and only Luis de Santángel can help him. Within the dramatic story lies a subtle, insightful examination of the crisis of faith at the heart of the Spanish Inquisition. Irresolvable conflict rages within the conversos in *By Fire, By Water*, torn between the religion they left behind and the conversion meant to ensure their safety. In this story of love, God, faith, and torture, fifteenth-century Spain comes to dazzling, engrossing life.

The Best of the Hack Mechanic Rob Siegel 2021-05-21 In 1986, after owning eleven BMWs in three years, Rob Siegel sent an unsolicited article to Roundel, the magazine of the BMW Car Club of America. Little did he know that it would kick off 35 years of do-it-yourself automotive writing, and that his monthly column The Hack Mechanic? would attract a community of like-minded enthusiasts who, like Rob, try to come up with creative workarounds to keep their cars running without taking them to the dealer every time they hiccup. More than just "use 10mm wrench on bolt B" instructions, though, the columns have always been small journeys into passion and problem solving, philosophy lessons disguised as a repair articles, and short stories about getting into and hopefully out of automotive trouble. The Best Of The Hack Mechanic? is a selection of these pieces, including ones on how to buy a vintage BMW and not get burned, the most creative way possible to lock your keys in a running car, why car folks will do just about anything to avoid buying a family minivan when the money obviously would be so much better spent on "something fun," why a car nut really does need seven cars, why the odds of having a car start is often inversely proportion to the number of cars in the driveway, why finding one of his father's tools is enough to make Rob cry, and why working on your car feels so damned good, all written in Rob's Hack Mechanic voice that hovers somewhere between J.D. Salinger, Bill Bryson, and David Sedaris. Informative,

irreverent, and poignant, *The Best Of The Hack Mechanic?* will have you hoping Rob has another 35 years of columns in him.
