Olga Rudge & Ezra Pound Anne Conover 2008-10-01 divA loving and admiring companion for half a century to literary titan Ezra Pound, concert violinist Olga Rudge was the muse who inspired the poet to complete his epic poem, *The Cantos*, and the mother of his only daughter, Mary. Strong-minded and defiant of conventions, Rudge knew the best and worst of times with Pound. With him, she coped with the wrenching dislocations brought about by two catastrophic world wars and experienced modernism's radical transformation of the arts. In this enlightening biography, Anne Conover offers a full portrait of Olga Rudge (1895–1996), drawing for the first time on Rudge's extensive unpublished personal notebooks and correspondence. Conover explores Rudge's relationship with Pound, her influence on his life and career, and her perspective on many details of his controversial life, as well as her own musical career as a violinist and musicologist and a key figure in the revival of Vivaldi's music in the 1930s. In addition to mining documentary sources, the author interviewed Rudge and family members and friends. The result is a vivid account of a highly intelligent and talented woman and the controversial poet whose flame she tended to the end of her long life. The book quotes extensively from the Rudge–Pound letters--an almost daily correspondence that began in the 1920s and continued until Pound's death in 1972. These letters shed light on many aspects of Pound's disturbing personality; the complicated and delicate balance he maintained between the two most significant women in his life, Olga and his wife Dorothy, for fifty years; the birth of Olga and Ezra's daughter Mary de Rachewiltz; Pound's alleged anti-Semitism and Fascist sympathies; his wartime broadcasts over Rome radio and indictment for treason; and his twelve-year incarceration in St. Elizabeth's Hospital for the mentally ill. /DIV

308 Circuits Jan Buiting 2003 This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

It is suited for undergraduate degree students of computer science engineering, information technology as well as computer applications. The book aims to introduce the students to the fundamentals of computing and the concepts of Python programming language, and enable them to apply these concepts for solving real-world problems.

The Book of L G. Rozenberg 2012-12-06 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Planning Sustainable Cities United Nations Human Settlements Programme 2009 This publication reviews recent urban planning practices and approaches, discusses constraints and conflicts therein, and identifies innovative approaches that are more responsive to current challenges of urbanization. It notes that traditional approaches to urban planning (particularly in developing countries) have largely failed to promote equitable, efficient and sustainable human settlements and to address twenty-first century challenges, including rapid urbanization, shrinking cities and aging, climate change and related disasters, urban sprawl and unplanned peri-urbanization, as well as urbanization of poverty and informality. It concludes that new approaches to planning can only be meaningful, and have a greater chance of succeeding, if they effectively address all of these challenges, are participatory and inclusive, as well as linked to contextual socio-political processes.--Publisher's description

Bridging the Urban Divide 2010 This title analyzes the complex social, political, economic and cultural dynamics of urban environments. In particular, the book focuses on the concept of the 'right to the city' and ways in which many urban dwellers are excluded from the advantages of city life, exploring links among poverty, inequality, slum formation and economic growth.

Critical Issues in the History of Spaceflight Steven J. Dick 2006 In March 2005, the NASA History Division and the Division of Space History at the National Air and Space Museum brought together a distinguished group of scholars to consider the state of the discipline of space history. This volume is a collection of essays based on those deliberations. The meeting took place at a time of extraordinary transformation for NASA, stemming from the new Vision of Space Exploration announced by President George W. Bush in January 2004: to go to the Moon, Mars, and beyond. This Vision, in turn, stemmed from a deep reevaluation of NASA's goals in the wake of the Space Shuttle Columbia accident and the recommendations of the Columbia Accident Investigation Board. The new goals were seen as initiating a "New Age of Exploration" and were placed in the context of the importance of exploration and discovery to the American experiences. (Amazon).

Tiberius Found Andrew Goodman 2014-01-17 What would you do if you discovered your whole life to be a lie? Daniel Henstock thinks he's an ordinary schoolboy but on his sixteenth birthday his world is turned upside down. He is the world's first one-hundred percent genetically-engineered human - assigned the codename Tiberius - and Gregory Dryden, the man responsible, wants him back so that he can continue his deadly experiments. Running for his life, Daniel flees to New York and is forced to go 'off-grid'. In this near-future America, where the security-obsessed authorities require citizens to carry DNA cards, Daniel meets the feisty and beautiful Eleanor. But by falling for her, Daniel also puts her in terrible danger. Daniel pursues the facts about his origins but is hunted by an agent sent by Dryden to bring him to heel. Can Daniel find out the truth whilst trying to evade those who think they own him? As his enemies close in Daniel must draw on resources he never knew he had to win his freedom - but in doing so he may be walking into a deadly trap ... TIBERIUS FOUND is the first instalment in a thrilling series - The Emperor Initiative - that introduces an engaging new hero that will appeal to fans of Alex Rider and Jason Bourne.

'What Thou Lovest Well Remains' Richard Arding 1986

Unfair Adam Benforado 2015 "A crusading legal scholar exposes the powerful psychological forces that undermine our criminal justice system--and affect us all Our nation is founded on the notion that the law is impartial, that legal cases are won or lost on the basis of evidence, careful reasoning and nuanced argument. But they may, in fact, turn on the temperature of the courtroom, the camera angle of a defendant's taped confession, or a simple word choice or gesture during a cross-examination. In Unfair, law professor Adam Benforado shines a light on this troubling new research, showing, for example, that people with certain facial features receive longer sentences and that judges are far more likely to grant parole first thing in the morning. In fact, over the last two decades, psychologists and neuroscientists have uncovered many cognitive forces that operate beyond our conscious awareness--and Benforado argues that until we address these hidden biases head-on, the social inequality we see now will only widen, as powerful players and institutions find ways to exploit the

weaknesses in our legal system. Weaving together historical examples, scientific studies, and compelling court cases--from the border collie put on trial in Kentucky to the five teenagers who falsely confessed in the Central Park Jogger case--Benforado shows how our judicial processes fail to uphold our values and protect society's weakest members, convicting the innocent while letting dangerous criminals go free. With clarity and passion, he lays out the scope of the problem and proposes a wealth of reforms that could prevent injustice and help us achieve true fairness and equality before the law"--

Memphis Noir Laureen P. Cantwell 2015-11-03 “A collection of stories celebrating the underbelly of the city, its ghosts, and the characters that give Memphis its rich patina of blues.” —Memphis Flyer The Home of the Blues knows how darkness can permeate a person’s soul—and what it can drive you to do. It’s the soundtrack to a city that’s made up of equal parts hope and despair, past and present, death and rebirth. On the streets of Memphis, noir hits the right note. Memphis Noir features stories by city standouts Richard J. Alley, David Wesley Williams, Dwight Fryer, Jamey Hatley, Adam Shaw, Penny Register-Shaw, Kaye George, Arthur Flowers, Suzanne Berube Rorhus, Ehi Ike, Lee Martin, Stephen Clements, Cary Holladay, John Bensko, Sheree Renée Thomas, and Troy L. Wiggins. “A remarkable picture of contemporary Memphis emerges in this Akashic noir volume . . . Something for everyone.” —Publishers Weekly “Covers train cars and Beale Street, hoodoo and segregation, Nathan Bedford Forrest and, of course, Graceland, and even includes a graphic novella.” —Memphis Flyer “Captures the subtlety of the Memphis ethos, where blacks and whites, rich and poor, are intimately entwined. The collection—fifteen stories by some of the city’s finest writers—bleeds the blues and calls down the dark powers that permeate this capital of the Delta.” —The Commercial Appeal (Memphis) “The new anthology Memphis Noir is replete with murders, ghosts, gangsters, a sharp-toothed baby, Boss Crump, and high water on the bluff.” —Memphis Magazine
